

SAI KUMAR BATTALA

Luton / London (Open to commute) | saikumarbattala10@gmail.com | +44 7721 604874 | linkedin.com/in/sai-kumar-battala | github.com/cybercomics | cybercomics.github.io/Sai_Kumar_Battala_Portfolio_

PROFESSIONAL SUMMARY

Certified Ethical Hacker (CEH) and MSc Cybersecurity student at the University of Hertfordshire with hands-on penetration testing and VAPT experience across multiple internships and structured training programmes. Proficient in offensive security tooling including Metasploit, Burp Suite, Nmap, and Kali Linux, with active lab practice on TryHackMe (Top 20%, 29 rooms completed) and Hack The Box. CTF finalist at UST GenCyS 2025. Targeting UK-based penetration testing, VAPT, or ethical hacking roles.

EDUCATION

University of Hertfordshire

MSc Cybersecurity (with Placement Year).

Hatfield, UK

Jan 2028

Alliance University

BTech Cybersecurity.

Bengaluru, India

May 2025

EXPERIENCE

Cybersecurity Intern, Security Operations

BirthdayMessaging

Jul 2026 – Present

London, UK (Remote)

- Collaborate with the Security Operations team to strengthen the organisation's security posture, mitigate risks, and streamline internal security documentation.
- Execute web application security scans and vulnerability analysis, producing prioritised remediation plans to protect digital assets.
- Support incident response and technical troubleshooting; track vulnerabilities, help implement security controls, and document incident response workflows.
- Audit existing security policies against industry best practices and interview key stakeholders to identify systemic gaps, drafting updated procedures for compliance.
- Author internal FAQs and reusable incident debrief templates that translate complex technical concepts for non-technical stakeholders.

Cybersecurity Intern, Ethical Hacking

InLighnX Global Pvt. Ltd.

Jun 2025 – Dec 2025

Remote

- Conducted penetration testing and vulnerability assessments on internal systems, identifying 5 to 6 vulnerabilities and successfully gaining root access through kernel-level exploitation.
- Exploited compromised machines to demonstrate attack paths and documented security vulnerabilities, delivering structured remediation reports with actionable recommendations.

Cybersecurity and Ethical Hacking Training Programme

KLEAP Institute of Information Security (KIIS)

Jun 2025 – Dec 2025

On-site

- Analysed network traffic using Wireshark to identify threats; performed vulnerability scanning and hands-on penetration testing exercises.
- Produced detailed security vulnerability reports and applied network monitoring techniques to strengthen system security.
- Received a Letter of Recommendation from KIIS for outstanding technical performance and practical cybersecurity skills.

Cybersecurity and Ethical Hacking Intern

Threat-Prism

Jun 2024 – Aug 2024

Remote

- Planned and executed penetration tests covering information gathering, footprinting, and exploitation of application and network vulnerabilities.
- Produced detailed findings reports with actionable remediation steps to strengthen overall security posture.

Virtual Cybersecurity Intern

Cisco Networking Academy / AICTE (Skill India)

May 2024 – Jul 2024

Remote

- Completed the Cisco AICTE Virtual Internship Programme, gaining hands-on exposure to network security concepts and security assessment fundamentals.

PROJECTS

Comprehensive Web Service Security Audit and Data Concealment

- Conducted advanced vulnerability detection and penetration testing on web services.
- Implemented steganography-based data concealment for secure communication; research paper prepared for publication.

Generative AI-Based Currency Detector for the Visually Impaired

- Designed an AI-driven system to detect and classify currency for visually impaired users, focusing on real-world accessibility and accuracy.

- Research published in IEEE Xplore.

HANDS-ON LABS AND CTF

- TryHackMe (Ongoing): Top 20% global ranking, 29 rooms completed, 5 badges earned. Practice covers Windows and Linux exploitation, reverse engineering, cryptography, privilege escalation, and CVE-based attacks. Challenges include: Windows Reversing Intro, Reversing ELF, Pentesting Principles, SoupeDecode, Crypto Failures, TryHack3M: Bricks Heist, and Rabbit Hole (Hard).
- Hack The Box (Ongoing): Active CTF challenge participation covering exploitation and reverse engineering.
- CTF Finalist, UST GenCyS 2025 (UST / CyberProof, Aug 2025): Competed in national-level CTF finals, applying ethical hacking, exploitation, reverse engineering, and problem-solving under competitive conditions.

SKILLS

Offensive Security: Penetration Testing, VAPT, Ethical Hacking, Vulnerability Assessment, Metasploit, Nmap, Burp Suite, OWASP Top 10, CVE Analysis

Network and Systems: Network Security, Wireshark, Kali Linux, Linux, Reverse Engineering

SOC and Threat Operations: SOC Fundamentals, Threat Detection, Log Analysis, Incident Response Basics, SIEM Fundamentals, MITRE ATT&CK Fundamentals

Cloud Security: AWS Security Concepts, AWS Network Firewall, Amazon CloudWatch, IBM Cloud Computing Fundamentals

Programming and Documentation: Python Scripting, Steganography, Technical Documentation, Security Reporting

CERTIFICATIONS

- Certified Ethical Hacker (CEH) - EC-Council | Sept 2025
- Certified Pen Tester (CPT) - KLEAP Institute of Information Security | Feb 2026
- Certified Cybersecurity Educator Professional (CCEP) - Red Team Leaders | Nov 2025
- Ethical Hacking Essentials (EHE) - EC-Council
- Threat Hunting with AWS Network Firewall Deployment - AWS Training and Certification | May 2026
- AWS Security Specialty (SCS-C03) Official Practice Question Set - AWS Training and Certification | May 2026
- Foundations of Cybersecurity - Google
- SOAR for Enterprise Security - Codio
- Introduction to Cloud Computing - IBM
